# Assignment 2 - Problem D

## Prioritizing buses for preventive maintenance

### Scenario

The team reviewed the fleet records and compared them with the workshop logs from last year.

The estimates cover approximately **10 available additional preventive inspections**.

## 3. Effect on the maintenance decision

The numbers should be treated as **estimates rather than guaranteed savings**.

## 4. This heading is deliberately longer than forty characters

A sentence that ends with **a bold run** and continues in regular text.

- have fewer sensors;
- have experienced sensor replacements;

The model relies much more strongly on these data.

The report should connect the

evidence to the recommendation.

# Evidence provided

## 6. Important limitations and uncertainties

### Maintenance actions influence the historical data

If maintenance prevented a failure, the record may show **no failure**, even though the bus was at high risk.

Some buses were never inspected.
